

**Quotations to replace defective shower blending valve (mixing valve) at the Iver Heath Pavilion**

After asking 6 plumbing contractors to quote to replace defective shower blending valve, I only received 3 responses. One verbal quote and 2 written quotes.

- |            |  |
|------------|--|
| Supplier 1 | Supplied a written quote of £900.00 plus Vat<br>(Price breakdown: Labour: £425.00<br>Materials: £475.00)   |
| Supplier 2 | Supplied a verbal quote of about £900.00 plus Vat  |
| Supplier 3 | Supplied a written quote of £80.00 per hour.<br>This job is charged by the hour and they could not confirm a fixed price for labour and parts. They would have to come in on site visit 1 to dismantle all shower mixers. Then send parts away to get replacements and costs. Then return on site visit 2 to fit the replacement valves. |

The other 3 contractors did not respond to my enquiry even though 2 of them visited the site to quote for the job.

**Recommendation: The Committee's further consideration and instructions in this matter are requested**
