

Q9

Are there any buildings, structures or gardens in The Ivers that are not already listed historic assets that you would like to see on a local list and protected by planning policies? If so, please specify exactly which buildings or other features and their location.

(I've not include those already in the Conservation Area.)

Raising awareness of the possibility of a local list may generate more suggestions from residents.

Would have liked to see a list of those already on the list.

I don't think there is anything in Iver that warrants this kind of support. Specifying (as a non-specific example) that a 200-year old building and it's 5 acres of surrounding grounds be kept exactly as is for the sake of some nostalgic viewpoint or because someone vaguely famous stayed there once is not a sensible use of the land

There is some original ironwork, mainly railings, on some Victorian properties. These should be noted and preserved in situ if possible. Catalogued if necessary before removal.

Red Lion pub in Shreding Green should be protected.
