

Response ID	Are there any existing public open spaces that are not well used and could be used for development? If so, which ones and what type of development would be appropriate?	Final Result				412
		Blanks	Yes	No	Other	
		143	60	189	20	100.00%
1	No, I feel Iver & Iver Heath are good as they are	34.71%	14.56%	45.87%	4.85%	
7	None that I am aware of. Maybe near the Iver Trading Estate					
8	Evreham - turn it back into a school.					
10	Not that I am aware of					
11	If necessary the land referred to in Question 5.					
16	Yes entrance to the Parkway on the 412, Iver Heath. Too narrow, open space. See site map attached.					
17	Not aware of any					
19	Prefer to protect, Use industrial areas for development. By station?					
20	Really any free space should be kept as much as possible.					
21	No development on PUBLIC open spaces					
25	Look for spaces where there is derelict factories before encroaching on the green belt.					
26	Iver Recreation Ground: Play equipment, add tea rooms, update toilets. Make it a place people travel to and stay for longer.					
43	The field adjacent to the motorway at the rear of housing and general services with adequate parking space.					
50	none, only brownfield sites can be redeveloped					
51	The gardens of large size					
56	Yes - field at the back of Iver Junior School - all weather football pitches, etc.					
58	Wood Lane, large gardens. Plots of land could be sold by homeowners.					
61	No. Retain all open spaces and let the residents know where they are. Important for people new to village					
66	Part of fields next to the road between Iver and Richings Park.					
69	If there are such spaces not well used, they should be cleaned up and keep it. Put back to countryside.					
70	In Iver open spaces are well used by all.					
74	We don't need development.					
76	No more development. Too much traffic already!					
83	We need youth clubs and gyms					

84	The field adjacent to the Church path between church and Slough Roads for car park and possibly some housing.
100	IVER HEATH NEED A COMMUNITY CENTRE
103	Any public open space should be kept - and if not being used - then to turn into recreation grounds or something for nature to develop.
107	Ridgeway Estate and that area.
119	The space between St Margarets Church and the Crooked Billet Roundabout.
121	None identified
122	SWAN MEADOW (?) WHAT IS THAT SPACE, IT IA JUST A FIELD
123	No development buildings on public open spaces.
124	NO MORE DEVELOPMENT IN THE IVERS.
132	No development on Public open spaces
134	To walk AROUND the area that is my home. I SEE the UPKEEP AND FULL USE OF THE AMEANATIES THAT WE HAVE.
139	Land next to the Church in Iver Heath which I belive is already being considered.
145	No idea of general usages eleswhere in area.
147	I think all our public open spaces should be retained. They are all important in the texture of a community.
149	BILLET LANE SPORTS FIELD CHURCH FIELD IVER HEATH GRAVEL PIT FIELDS PINWOOD RD HOUSING FOR LOCAL FAMILIES - NOT COMMERCIAL
152	A6. Swan Meadows has apparently been ruled out as a possible burial ground now that the churchyard is full; it might be worth further investigation to see if this could be feasible.
153	NOT IN IVER VILLAGE
155	The land around Thorney Business Park for which the owners are contemplating development into Richings Park Village North. The land alongside Thorney Lane South which is being contemplated for a station car park.
157	NONE IN IVER NO BUILDING SHOULD BE DONE AROUND RICHINGS PARK

159	By Development you must mean Building & the recent refurbishment of the Old Post Office here in Richings park is a example of good brown field development.
173	6. See above. The yards off the high street (no 12-18) are an eye saw and should be converted into parking.
186	as above, but surely the care home would be providing homes and that would be classed as housing but on a smaller foot print
189	None that come to mind. Development in the way of housing or car parking is totally unacceptable
191	At the northern end of Swan Road there is a former dairy farm (I believe) which could be utilised for development. Access might be an issue given the closure to the public of the Coppins area but that shouldn't be insurmountable.
194	Iver Heath Fields could be better used as a public open space for get together events, such as community parties
206	There seem to be several unused fields along Thorney Lane.
210	I think both of the above, Iver Heath Rec and the land between the Church and 5-points roundabout would be suitable for development also
214	The former Highways Depot, Uxbridge Road, Iver Heath. This is polluted and should be used for housing.
218	I can only think of open spaces that are private.
219	No idea of general usages elsewhere in the area
225	Need to protect existing public spaces.
238	No. Natural land does not need to or have to be built on. It is there because that is how it has always been - a natural habitat and should be preserved that way for inhabitants, human or animal and vegetation to benefit from.
239	There is a substantial amount of Green Belt land which does not fully satisfy the purposes of the Green Belt as defined in national policy. Much of this is not accessible to the public and has no amenity value to existing residents. Land which fits this description should be prioritised for development over any land which is accessible to the public.

242	All open spaces, including the recreation parks and golf courses must be retained unspoiled. The health and well being of the populations depends on our retaining for the future these areas where residents can enjoy their leisure time.
251	The area to the east of Mansion Lane would seem suitable for a range of small housing developments. This needs to be supported by improved infrastructure.
252	I have no view on this
254	None - existing public open spaces should all be retained as with the expected influx of people and traffic arising from expected population changes and major infrastructure they will be of even more value and importance for community well-being
256	As above Gams field, but not with added buildings! it would make a really nice rural garden area for the village and residents to enjoy
259	Evreham fields
266	If there are any then it should allow parking and the roads capable of taking the traffic
269	No. Just because open spaces are not used for recreation does not mean they are not valuable. These spaces are valuable for the reasons given above - they preserve the semi-rural nature of our local area and help to mitigate air pollution.
270	No although some of the routes to and the public spaces are not well maintained, which can prevent their use by the public / dog walkers etc.
275	Only for new roads as by-passes or replacement roads.
276	I can't think of any...
280	I am against any new commercial and industrial development. We do not need any more industry in this area as it is already highly polluted and commercial areas such as shops are already underused
285	Field between Church Road & Slough Road. Gams Field project provided the council don't have to foot the bill for maintenance.
289	Iver Heath Rec ground isn't used often except for unruly teenagers smoking weed all the time.
307	I think there could be more within the Iver recreation grounds ie: tennis courts/badminton courts etc

311	some allotments which seem underused
318	I would not want to see any development of land designated Green Belt
324	A well maintained cycle and walking path from the village down Thorney Lane would be good. Quite often after rain it is impossible to use, and dangerously slippery.
330	Ground near iver station for car parking. To relieve richings park of computers parking dangerously
331	THE FIELD BETWEEN CHURCH ROAD AND SLOUGH ROAD.
334	Do not know of any that are not well used.
338	Yes the land near Fourell Paddock should be used to develop homes as this is wasted space not accessible to the public.
340	Fourell paddock as not accessible to the public
358	No. Iver cannot cope with further development.
361	between Iver village and the railway line - but must have the right infrusture put in and not just be housing without the ability to give Iver High Street some traffic relief from HGVs
364	The Court Lane Trading Estate use for more housing
367	Not public open spaces. It would seem sensible to use the land near roads for development, although the impact on the traffic and ability for people to move around would need to be evaluated. Evreham land appears very poorly utilised when there are sports facilities in other areas of The Iver
370	I would look at it from a different perspective. Where public spaces are under-used, we should try to establish why and then improve facilities/access in order to encourage greater use. We should be mindful that, if there is significant housing development within the Parish, there will be greater demands on open spaces. We need to plan for the future, not the status quo.
373	Build on Iver Rec, huge open space, could be used for plenty of housing.
374	Sites at Thorney Lane and North Park would be ideal development sites. If the Wralth Tunnel goes ahead that sterile land would be ideal.
375	Everham Centre
390	Slough!

392	There are none we just have enough green areas most are taken by houses why spoil the village with loads of houses. Iver is suppose to be a village not a city.
393	I BELIEVE ALL OPEN SPACE IS WELL USED BY LOCALS.
400	Iver Recreation Ground is not well used. It could be developed for a secondary school since there are none in the Ivers and this would help save the council some costs associated to school transport as well removing the ancient and polluting school buses from the roads.
409	Ridgeway estate used for bypass relief road
435	Don't develop any of the land. The infrastructure - in particular, the roads - cannot cope and it is causing pollution. I do not want Iver turned into an industrial estate or a suburb of Slough. If you allow any development that is what will happen.
446	Q6 Maybe, only maybe, the recreational ground in Church Rd could be built on and the facilities moved to the South Eastern Iver Fields ?? (see later idea)
451	Don't know of any suitable land.
453	I'm not sure which public open spaces aren't well used, however, a good development would be a recreational park for children or even a general park for picnics or walking etc.
465	The land at Richings Sports Park has been earmarked for a children's playground and the Richings Park Residents Association is currently fundraising to raise money to build it. There has never been a children's playground in walking distance to Richings Park and now that there are a lot more young families in the area it's important that this is supported by the council. Also, the area at the end of Old Slade Lane could be developed into open space for public recreation, dog walkers, bike riders etc. Anything that benefits young families and brings the community closer together will be a good thing
469	Iver Rec... underused other than by saturday/sunday league football
471	No further development is appropriate in an over crowded area.

475	Thorney Park is under utilised. It's a nice area for wild life and dog walking/fishing but could be redeveloped for better use. Unfortunately, it was developed previously but quickly became a local 'hot spot' and then fell into disrepair.
482	Possibly the fields on the left when driving from Richings Park at Thorney Lane to Iver? The field before the canal?
486	Iver rec ground needs to be updated. It isn't safe and lacks enough playground activities
488	Land in ownership of Bucks County Council Evreham and land to north of Evreham as an extension of Martindale for affordable homes and
498	None that I am aware of. The point is that easy options such as 'public open spaces' should not be the areas targeted. The current brown/vacant/poorly used brown land and developed areas should be put to better use.
504	Don't know many but Iver Station Area could be better used
506	Land between Church Road and Slough Road, Iver Heath - plans submitted for care home (desperately needed in the area!)
516	All areas that are now public open spaces should be kept the same
523	Iver High Street has unused buildings which is a shame as looks shabby and rundown.
531	Not known to me but this doesn't mean that they don't exist.
535	Impossible for me to say but if one man walks his dog on an open space I'd say that it was well used
540	No. All public open spaces must be left as they are. NO DEVELOPMENT
547	Evreham School Housing.
549	The land opposite the old post office in Richings Park should be used for a car park which is desperately needed for station parking.
559	Land in Thorney Lane, either side - housing NOT industry
561	Answer All existing public open space should be retained
562	Answer Any brownfield sites which could be redeveloped
563	Answer I think more spaces have an intrinsic value and development would severely affect their locality

568	Answer Before looking at any open space issues need to look at road relief and use of existing transport hubs
570	Answer Not known. All open spaces are well used by residents
574	Answer There is a case for the fields south of Iver having a bypass to relieve the terrible traffic problems in the village
575	Answer Open space on/along Slough Road in Iver Heath - turn into a park
576	Answer All existing public open spaces should be retained for their present usage or improved
585	field next to Evreham Centre - to be used for secondary school
