

Public Access and Open/Green Spaces Policy - 12/10/16

Given Iver Parish Council's proximity to a number of existing and proposed major national infrastructure projects and systems, all open spaces within the parish boundary (whether owned or managed by the council or others) are considered to be extremely important assets for the health and wellbeing of local communities, and their protection is being addressed in the Iver Neighbourhood Plan.

The Parish Council supports the maintenance of all open space within the parish to ensure satisfactory levels of local provision for all residents and visitors.

The loss of protected open spaces will be resisted unless equivalent or better quality provision is made within the local parish area. Replacement of one type of open space with another is unacceptable unless an up to date needs assessment shows that this would be appropriate.
