## **032/21 LINK PARK**

Cllr Wendy Matthews reported:

- Once an application for outline planning permission is granted, the property owner can apply for a change of condition in the future, enabling the property to be used for a different purpose e.g. warehousing.
- Flood zone mitigation and connection to the grid are needed if the data centre is to go ahead.
- Granting permission for a data centre allows for planning permission to be granted in the green belt. The land owners have reported that once planning permission is granted they will sell the site.
- Mitigation requests have to be related to the site and neighbouring area in question.
- Travel restrictions to the site cannot be included in the mitigation requests but can be included as part of planning conditions.

**Resolved councillors** to submit a focussed mitigation request, including:

- Protection work at Thorney Lake and Park.
- Highspeed broadband installation for local residents.

**Resolved councillors** to coordinate a Parish Council objection to the outline planning application, to include; effect of being located in an area identified as a flood risk and green belt; risk of generating increased traffic and road safety issues; risk of exacerbating air pollution.
