Northern Part Of Former Woodlands Park Landfill Site Land South Of Slough Road Iver Heath Buckinghamshire
Construction and operation of a 57MW battery storage facility, landscaping, fencing, and extension and widening of internal site access track.
IPC Comments: Object as the area is subject to Green Belt policy. Concern regarding the ecology report which states that the area is subject to a high water table and regular flooding and the subsequent risk of water contamination if the facility is flooded. Displaced floodwater could cause flooding at the nearby Iver Environment Centre and risks ecological damage at the site. The plan for the facility contradicts the emerging Local Neighbourhood Plan. HGV movement through Iver Heath will increase during the construction phase. Note: the pond, which relieves floodwater, was previously a larger lake which has subsequently been filled in.

Recommended: Cllr Cook and Business Administrator to submit a letter of objection and mitigation requests by 22nd October 2021.
