29, Iver Lane

28, Iver Lane

EXISTING FRONT ELEVATION

29, Iver Lane

28, Iver Lane

PROPOSED FRONT ELEVATION

VOLUME CALCULATION

Dormer Volume Calculation

Length = 6.36 m
 Height = 2.30 m
 Width = 3.07 m

$$\begin{aligned} \text{Volume} &= 6.36 \times 2.30 \times 3.07 \text{ m} \\ &= 45.00 \text{ m}^3 / 2 \text{ (divide by 2)} \\ &= 22.50 \text{ m}^3 \end{aligned}$$

Hip to Gable Volume Calculation

Length = 4.896 m
 height = 4.896 m
 Width = 3.98 m

$$\begin{aligned} \text{Volume} &= 4.896 \times 4.896 \times 3.98 \text{ m} \\ &= 95.40 \text{ m}^3 / 4 \text{ (divide by 4)} \\ &= 23.85 \text{ m}^3 \end{aligned}$$

Missing Hip to Gable Volume

Length = 3.07 m
 Height = 2.30 m
 Width = 0.81 m

$$\begin{aligned} \text{Volume} &= 3.13 \times 2.30 \times 0.81 \text{ m} \\ &= 5.83 / 2 \text{ (Divide by two)} \\ &= 2.916 \text{ m}^3 \end{aligned}$$

TOTAL VOLUME

$$\begin{aligned} &= 22.05 \text{ m}^3 + 23.85 \text{ m}^3 + 2.916 \text{ m}^3 \\ &= 49.26 \text{ m}^3 \end{aligned}$$

Notes:

All dimensions are in mm.

All dimensions shown on drawings are approximate and are subject to site tolerances.

All dimensions are to be cross checked on site prior to works commenced.

The whole of the works is to be in full accordance with the Building Regulations and relevant approving bodies.

All external materials are to match with existing materials.
