

## **Installation of an Information Board on Swan Meadow Groundwork South**

Appendix 8b

The following request has been made by Deborah Valman, Programme Manager (Thames Valley) at Groundwork South concerning an information board at Swan Meadow:

*As part of my project with the Community Board which focuses on the circular walks we would like to ask your permission to put up an information board on Swan Meadow. This would be at the main entrance and facing the lane or at right angles to the lane. It would feature the bio diversity of Swan Meadows, it's place in the Colne Valley Regional Park and mention the circular walk which runs next to it as well as having a QR code so people can look up the walk on their phones. Would the IPC give us permission to erect this board? Subject of course to their approval of the final design. All costs would be covered by the Community Board grant that I am holding for works on the circular walks.*

### **Recommendation:**

That the Deputy Clerk works with Groundwork South to progress this including the design and brings any future required decisions to future committee meetings.
