

Allotment Update

Iver Heath Allotments

Total number of allotments currently available for rent: 45 *

Number of allotments currently rented: 44

Number of allotments currently vacant: 1 **

Number on the waiting list: 11 (of these, 2 are waiting for specific plots to become available.)

* Cllr Stanhope has identified some areas within the allotment site that could be rentable allotments. The Business Administrator will arrange a site visit with Cllr Stanhope to understand where the new allotments are located and will arrange visits for those interested on the waiting list.

** Plot 24 is currently vacant and awaiting conversion to an accessible allotment garden – minute number 191/22.

Iver Rec Allotments

Total number of allotments currently available for rent: 35

Number of allotments currently rented: 33

Number of allotments currently vacant: 2 ***

Number on the waiting list: 7

*** Plot 12 is severely overgrown with brambles but there is interest from one person on the waiting list (a site visit arranged for 21st April was postponed due to bad weather).

*** Plot 15 is also unrented as it has a large oak tree on half of the plot. It was suggested to use this area as a communal compost area. However, one person is waiting for a half size plot, and it is recommended not to create a communal compost area and instead rent out half of the plot (which doesn't contain the large oak tree).

Non Cultivation - Allotment Site Inspections

Together with Cllr Stanhope the Business Administrator will conduct allotment site visits, in the early summer, to identify uncultivated plots and will give notice to the allotment tenants if no improvements are made within the prescribed timescales.
